SC Governor's School
for Agriculture
AT JOHN DE LA HOWE

PRINCIPAL'S REFLECTION

GREGORY THOMPSON

Earlier in my career, I taught middle school social studies. On the first day of school every year, I did a brief introduction and found out the interesting things my students did over the summer. The most important thing I did that day was to express to them the importance of **goal setting**. When I was in college I read an article on goal setting. Research and studies have found that you are 42% more likely to achieve your goals just by writing them down.

I gave each of my students two index cards and explained to them the importance of setting goals. I also explained to them the difference between a short and long-term goal. I spelled out to them that short-term goals are things you want to accomplish between now and the end of your high school career. Long-term goals are things you want to accomplish after high school and within your career aspirations. They were asked to put both of their goals on each index card. If time permitted, I would ask a few students to share their goals with the class. At the end of the class, I required the students to tape one of their goal-setting cards to the inside cover of their textbook and turn the other into me.

CONTINUED ON THE NEXT PAGE

4-H HORSE JUDGING

Congratulations to our Aggies who competed in the **2021 Virtual SC 4-H Horse Judging Contest** and placed **2nd overall!**

A special **congratulations** to **Alyssa Gillman**, who placed **1st** in the **Top Three Placing Phase!** The team was coached by our Agricultural Education Teacher, **Libby Templeton**.

(l-r) Brooke Grondski, Alyssa Gillman, Jenna Tucker, and Kyleigh Adams

AGGIE OF THE MONTH COLLIN GREENE

Collin Greene is a 10th-grader at JDLH from **Anderson, SC**. He is noted as being a "**hardworking and conscientious young man**" who is "**reliable, driven, and a pleasure to work with**". Collin participates in the Field Trial Team, Shotgun Team, and will be competing in the Agricultural Mechanization CDE.

Ag Teacher, Mr. Abrams, says that Collin is "**always ready to work and can run any equipment on the farm**".

PRINCIPAL'S REFLECTION

GREGORY THOMPSON

Throughout the year I would have several parents and individual student conferences with my students. I would often refer my students back to their goals during the conferences. I felt this strategy helped a lot because all of my students' goals required them to pass the 8th grade and obtain a high school diploma. This also helped them in making better decisions and improving their focus.

I spent 10 years teaching at the middle school level before moving on to school administration. After ten years in the classroom, I attended a school board meeting that I will never forget. Earlier in the week prior to the board meeting, the Public Safety Department issued a warning to the entire school district. They highly encouraged people not to park behind the Board of Education building in the evenings because of the recent criminal activities that were occurring in the evenings. For some reason, I completely ignored the warnings and parked back there anyway. I figured nobody was going to mess with Mr. Thompson.

After the meeting, as I approached my car I noticed that it was the only car parked in the lot and the area wasn't well lit. I thought to myself this was a prime location for someone to get mugged. As I was walking towards my car, another car drove slowly past me then stopped and backed up until I was parallel with the car. My defensive guard was up because I didn't know if I was going to need to run, fight, or yell for help. The driver rolled down the window and asked me if I was Coach Thompson. After I verified myself, she told me her name and mentioned I was her 8th-grade Social Studies teacher. I recognized the name, but could not recognize her face because it was dark. She told me that she kept up with her goal-setting card from when I taught her in middle school. I was stunned and amazed, but I wasn't prepared for her next admission. She told me that her long-term goal on her card was to be a medical doctor. She mentioned to me that this was her last night in town because she was flying to Seattle, Washington in the morning to work at a hospital and start her medical residency. This was her last step in accomplishing her long-term goal. It was amazing how my initial fear turned into a positive reunion. After we said our farewells and she drove off, I teared up because I was so happy and proud of my former student. **This encounter restored my belief in recording your goals.**

Throughout this year I've gotten a chance to have several conversations with our students. I often ask them what their plans are after high school. Our students are confident and excited to share their post-secondary plans with people. I feel our students are ambitious and eager to make their mark in this world. Most of our students don't realize that their goals are SMART goals. SMART goals are specific, measurable, attainable, relevant, and time-based. SMART goals help people create a clear road map for success. Our school is committed to helping our students to obtain their goals by providing them with a quality education. I encourage everyone, if you haven't already, to put your personal and professional goals in writing. This is the first step in successful goal setting.

In closing, when I was dating girls in high school, my Dad told me if I was at a young ladies' house and her dad cleared his throat, it was time for me to go home. On May 28th, I will be clearing my throat because it will mark the last day of school and all of our students will have to go home. This will mark the end of an incredible school year and I feel honored in being the educational leader of this great school.

FROM THE PRESIDENT

TIMOTHY KEOWN

Our Aggies have had an eventful month! Our students enjoyed a well-deserved **Spring Break** but came back to campus with a full academic load waiting for them. As we approach the end of the school year, we will begin to slow down the field trips and extracurricular activities so that our students are prepared for their exams. However, we didn't slow down any in April! Our students took advantage of several off-campus opportunities. The **History Club** took a Saturday trip to **Charleston** with **Dr. Price**. Our **Equine and Animal Science** students visited the **Aiken Thoroughbred Hall of Fame and Museum and the Aiken Training Track**.

The on-campus activities this month were packed in tightly but were very successful! **Mr. Abrams' Horticulture** class had their **Greenhouse Sale**. We had over 180 cars come through the gates within a 3 hour period. I jokingly referred to that day as the first traffic jam in McCormick County's history! Our **Prom** was well attended and I was extremely proud of our student's behavior **AND** their dance moves! Normally, I see our Aggies in their farm clothes. It was refreshing to see our students looking beautiful and dapper! **Dr. Platt** and her prom planning committee did a wonderful job with this event.

In their Ag. Labs, our students had several unique hands-on opportunities. They placed CIDRs in our herd and banded bull calves. They gave vaccinations to our pigs. They also helped to cut, rake, tetter, and bale the first cutting of hay. With the help of **Bob Rozier**, they planted their first research row crop plot where they will collect data on seven different varieties of corn. Our **Farm Staff** will assist with the measurements during the summer months. The community nature trail is being built and is looking great! Our **Natural Resources** students are building that with the use of our bulldozer and other equipment.

We had an amazing guest speaker, **Dr. Bill Boone**. Dr. Boone is a reproductive physiologist and spent his early career perfecting embryo transfer in sheep and cattle. He is a true pioneer in the industry and began his career in agriculture which resonated with our students. Our young people were enthralled with his presentation and asked great questions afterward. We are excited that he retired near our campus so we will be able to expose next year's new crop of students to him.

POWER PLANT SC

The **JDLH FFA Chapter** participated in an initiative launched by the **South Carolina Floodwater Commission**. This ambitious effort allowed for the planting of 3 million tree seeds – assisted by citizens, students, churches, non-profits, municipal governments, private sector partners, and other civic-minded organizations and volunteers – on **Earth Day**, Thursday, April 22nd.

Dubbed **“Power Plant SC”**, the statewide project is the **largest single-day tree planting event in American history**. The Commission assembled a coalition of public, private, and non-profit environmental partners to raise awareness about the importance of trees to human and environmental health, not the least of which is the mitigation of disastrous flooding.

Our school planted over 2,500 trees to help with this goal. These trees, once sprouted, will go home with students and people in our community!

PROM 2021

DR. STACY PLATT

The first JDLH Prom was held on Saturday, April 16th at the **McCormick County Talmadge Wellness & Fitness Complex**. The theme for the evening was **Fairytale Magic**; each table was decorated as a different fairytale, including Beauty and the Beast and The Little Mermaid. Our Faculty & Staff all pitched in to help decorate and chaperone. The kids had a great time!

A full album of pictures can be found on our School's Facebook Page:
South Carolina Governor's School for Agriculture at John de la Howe

SPRING GREENHOUSE SALE

RUSS ABRAMS

Thank you to all who attended our **Spring Greenhouse Sale**! Our Greenhouse Sale was held April 15-17th and around **500 people visited our campus and bought plants** over the three days. We sold over **500 hanging baskets, 800 annuals, and 2,500 vegetable plants**.

COVID-19 VACCINE #2

WELLNESS CENTER

Our JDLH Faculty & Staff received their second COVID-19 vaccine on April 1st! Thank you again to **Abbeville Area Medical Center** for coming to our campus to provide this opportunity and helping us keep our campus community safe.

ETIMOS GROUP DONATION

We'd like to extend a thank you to the **Etimos Group** and **Joshua Taylor**, Founding Partner, for donating **5 emergency life-saving trauma kits** to ensure the safety of our JDLH students, staff, and visitors. On April 2nd, Mr. Taylor visited our campus to drop off these donations.

The Etimos Group was recently contacted to provide **CPR, general first aid, and Stop the Bleed training** and noticed a need for more emergency resources throughout our 1300-acre campus. Thank you again for this generous donation!

BOB ROZIER

CORN TEST PLOTS

On April 13th, our Aggies received a hands-on lesson from **Bob Rozier**. Bob has 40 plus years in the Seed industry and previously spoke to our students about his career endeavors and experience. On this day, he guided our students in **planting corn research test plots** on the JDLH campus.

DR. BILL BOONE

Thank you **Dr. Bill Boone** for visiting our campus and giving our students a valuable lesson! Dr. Boone received his Ph.D. in **Reproductive Physiology** and spent most of his career in the medical field as a **Director of In Vitro Fertilization laboratories**. He is now retired and lives in **Abbeville, South Carolina** with his wife, Edna.

As a hobby, Dr. Boone has spent numerous years conducting **research on the American black bear**. He has also produced the **world's first Polled Hereford calves by bisecting embryos** and the **world's first bear cub from embryo transfer**.

TAMERA RICHLINE

CHAFFHAYE FEED TRIAL

Thank you to **Tamera Richline**, Field Nutrition Specialist with **Chaffhaye** for visiting the JDLH campus. We are so excited for the students in our **Small Animal Care** program to participate in a **Chaffhaye Feed Trial**.

Chaffhaye has **supplied all feed and data collecting tools required** for this trial. Our Aggies will help with determining if introducing Chaffhaye into the diets of small animals (rabbits, guinea pigs, various rodents, etc.) benefit their overall health and body condition.

USDA VETERINARY SERVICES SC

Our students received a visit from employees of the **U.S. Department of Agriculture Veterinary Services South Carolina**! Thank you to **Ellington Willis**, Animal Identification Coordinator, **Dr. Sarah Kline**, Veterinary Medical Officer, and **Kristen Glenn**, Animal Health Technician for giving our students a lesson on **Animal Disease Traceability**.

U.S. GOVERNMENT

DR. MICHAEL PRICE

Students in Dr. Price's **US Government** class were visited by **Ken Durham, Mayor of Edgefield** on April 14th. As our Aggies work to understand the structure and function of the government at all levels in the United States, they were able to ask Mayor Durham questions about his role and learn more about what it takes to hold this position.

U.S. HISTORY

DR. MICHAEL PRICE

The month of May will be filled with **final exams and End of Course (EOC) tests** for our Aggies. To aid in their studying, Dr. Price's class utilized timelines to review.

DR. DE LA HOWE'S HOME SITE

DR. MICHAEL PRICE

Students in Dr. Price's class took a trip to **Dr. John de la Howe's home site**. Their tour was guided by **Brandon Platt**, who is a Graduate Assistant at the **University of Georgia**. In the Fall of 2019, Brandon assisted in conducting a Design Charette of our school's campus with **UGA's Center for Community Design and Preservation**.

CHEMISTRY 1

JORDAN GLACE

In **Chemistry 1**, students are completing their unit on **Reaction Stoichiometry** during which they learn to manipulate units to convert between grams and moles of different chemical substances within a chemical reaction. They also completed a reaction stoichiometry lab during which students reacted sodium bicarbonate and acetic acid and calculated the % yield of their precipitate and % error for the reaction.

In **Biology 1**, students are working on their **Ecology Unit**. They discussed the **reintroduction of wolves to Yellowstone National Park** and how it impacted the ecosystem. Then, they completed an activity during which they graphed and analyzed data to show the **carrying capacity of the deer population on the Kaibab Plateau** and how the influence of the creation of the **Grand Canyon National Game Preserve**.

In **Biology 2**, students are finishing the **Plant Reproduction and Response Unit** by studying the **relationship between plants and humans**. After completing an interactive activity on **Plant Energy and BioFuels**, students composed a Claim/Evidence/Reasoning stating their choice for the **best fuel type to research and fund**, taking into consideration the **energy density and % greenhouse gas reduction** after analyzing data.

ANIMAL SCIENCE

LIBBY TEMPLETON

Students in Mrs. Templeton's classes, alongside our **Farm Staff**, have had some great hands-on experiences this month. They have been working with our cow and calf operation and put in **CIDRs (Controlled Internal Drug Release)** in our cows and **banded bull calves**. On April 29th, **Animal Science** students utilized their **Artificial Insemination Certification**, obtained through **Select Sires**, on our cattle here on campus. Our Aggies also got the opportunity to **give vaccinations to our pigs**.

FORESTRY

HUNTER MORTON

Students and staff are working to put in a **new trail through our forest**. This addition will add approximately a mile extension to the trail we made in early January. We hope in the future we can use this as a nature trail for our school and community to enjoy.

The **Forestry and WHEP teams** are also preparing to compete for their contest in the upcoming weeks.

EQUINE & ANIMAL SCIENCE TRIP

LIBBY TEMPLETON

Our **Equine and Animal Science** students took a trip on April 21st to **Aiken, SC** to visit the **Aiken Thoroughbred Hall of Fame and Museum** and **Aiken Training Track**. They had a special tour led by **Lisa Hall**, Museum Coordinator and author of "**Aiken Thoroughbred Racing Champions**". Students also met with **Brad Stauffer**, President of the **Aiken Training Track** and **Head Trainer of Legacy Stables**.

HISTORY CLUB TRIP TO CHARLESTON, SC

DR. MICHAEL PRICE

The **JDLH History Club** took a Saturday trip to **Charleston, SC**. The trip included:

- A 90-minute **guided bus tour of historic Charleston**
- A 30-minute **cruise on the boat "The Spirit of the Low Country"** to historic **Fort Sumter**
- A **guided tour of Fort Sumter** by one of the park rangers for one hour and then we had a 30-minute return **cruise**.

Some of the **trip highlights** were:

- Charleston's Historic Homes
- The Battery Sea Wall
- The Battery Park and Gardens
- Historic Churches
- Old Market Area
- The Four Corners of Law
- Rainbow Row
- Fort Sumter
- Aircraft Carrier Yorktown
- America's longest cable-stayed bridge
- Eating at Fleet Landing for some authentic Charleston Shrimp and Grits and She Crab Soup
- Eating at Gilligan's Seafood Restaurant for some fried shrimp and crab leg clusters

Students who attended: Aestas Hodge, Valeria Vazquez, Kyle Gilreath & Jason Connors

VIRTUAL INCOMING STUDENT PANEL

CADIE GIBA

On April 21st our **Admissions and Outreach** department hosted a **Virtual Incoming Student Panel** alongside some of our students. This panel was for **students that have been accepted for the 2021-2022 school year**. Accepted students and their families were encouraged to join and hear from our current students about their campus experience.

Students Involved: Jake Simpson, Allyson Wright, Trey Haddon, JaQuez Perry, Collin Greene, and Riley Cox

SCHOOL VIEWBOOKS

Our new **School Viewbooks** are in! To request a physical copy, please email admissions@delahowe.sc.gov or pr@delahowe.sc.gov. A digital version can be found on our website as well.

REMINDER: We are still accepting Admissions Applications on a rolling basis for the 2021-2022 school year. If you are or know of a 10th, 11th, or 12th grader interested in attending JDLH, contact our Admissions team!

SC Governor's School for Agriculture LIBRARY

JENNIFER BROWN

LETTUCE HARVESTING

On April 19th, we harvested our **first crop of lettuce** from the Library **hydroponic system** with the help of students and staff. **141 healthy heads of lettuce** were pulled after **only 31 days from seed to harvest**. Thanks to our wonderful **Cafeteria staff** we enjoyed the lettuce all week in our salads, tacos, burgers, and more!

NEW CROPS IN HYDROPONIC SYSTEM

Students are getting ready to grow another crop in the library **hydroponic system**. On April 26th, they added H₂O₂ to run a cleaning cycle. They also planted **cilantro, basil, kale, spinach, and lettuce seeds** in the Rockwool flats. After three days, students will put the sprouts into the indoor growing system.

The hydroponic system is thanks to the partnership with the McCormick County Library made possible by a Library Services and Technology Act grant from the Institute of Museum and Library Services administered by the South Carolina State Library.

SC Governor's School for Agriculture LIBRARY

LISA ANNE CULLEN CONNECTED COLLAGES

The Library is grateful to have hosted author and illustrator, **Lisa Anne Cullen**! She conducted a two-day workshop with students & guests on creating **Connected Collages**, an art process she uses in her books. Her books, **Little Orange Honey Hood** and **Three Wild Pigs** have been added to our Library Shelves as well.

SC Governor's School for Agriculture LIBRARY

MCCORMICK COUNTY LIBRARY TRIP

The JDLH Library took students to visit the **McCormick County Library** to learn about the invaluable services public libraries offer to their communities. Students also checked out books and ate ice cream.

Thanks to our partnership with McCormick County Library, students have access to their entire collection. In most cases, we offer next-day service of requested materials to students, faculty, and staff.

TEEN CUISINE

Our Aggies have been participating in **Teen Cuisine** cooking classes with **Brandi Anderson**, Nutrition Educator with **McCormick County Clemson Extension**.

This month, students learned **knife cutting skills**, the **importance of a healthy breakfast**, and **how to cook tasty scrambled eggs**.

SC Governor's School for Agriculture LIBRARY

HICKORY KNOB STATE PARK

On April 25th, the Library took students on a hike at **Hickory Knob State Park**. They **identified, trees, bees, snails, fungi, lichen, and caught a green anole**. The trip was finished off with a late lunch and ice cream.

SUMMER PROGRAMS

The Education Center is excited to announce the dates for our **2021 Summer Programs!** We will offer **multiple day camps** for all ages in **June 2021**.

We will also host **The Aggie Adventure** from July 18-21, 2021! This summer program is designed for **8th and 9th-grade students** who are interested in agriculture. Students will spend **4 days and 3 nights** immersed in agricultural education at JDLH. Students interested in attending The Aggie Adventure **must apply**. The application can be found on our website.

FIELD TRIPS

The Education Center hosted two field trip groups during the month of April. Thank you to **Evans High School** and a **Homeschool Group from the Upstate** for visiting our campus!

Both of these groups participated in Ag Labs on **swine, equine, and field trials**.

CONTAINER GARDENING WORKSHOP

Thank you all who participated in our **Container Gardening Workshop** on April 29th! This workshop's presenter was **Amanda Owen** who works as a **Horticulturist** at **Sage Valley Golf Club**. Amanda is also the owner and operator of **Creek Bottom Landscape Design** and **The Floral Bar**.

To be featured in our "Careers in Agriculture" Blog, email Cadie.Giba@delahowe.sc.gov.

BLOG: CAREERS IN AGRICULTURE

ALEX BERRY

Growing up on a **5th generation family farm**, I knew one day I was going to be involved, but how and when were questions always sitting in the back of my head. My name is **Alex Berry** and I am a 2019 graduate in **Agriculture Mechanization and Business** at **Clemson University**. I have lived in **Saluda County** all of my life and have been around the "farm life" ever since I can remember. My grandfather, John Faye Berry, began farming at a young age and has been someone I have looked up to my whole life. He began to row crop in the early 1960s and was also in the construction business for a few years. He retired from both of those around the time I was born, with the exception of growing a few acres of corn. Beef cattle are the main focus on our farm as we have a variety of around 250 head of Angus and Herford cattle.

Each year on the first weekend in November we host an **antique tractor show and pull at our farm, Richland Creek Farms**. The fall show is something I look forward to every year and numerous friends and family from our community volunteer to help put it on. We do demonstrations such as threshing machines, sawmill, syrup cooking, and blacksmithing; just to name a few. People from numerous states come and camp for the weekend and bring their own tractors and equipment to show. It's a great way to teach the younger generation how far farming has come along and to see how old equipment operates.

Growing up, I spent most of my time on the football field or baseball diamond but if I wasn't there, I was in the shop alongside my granddaddy working on an antique John Deere tractor. He has been a collector for over 30 years and has a collection of nearly 60 antique tractors. I spent a lot of time observing and learning from him while growing up and am now getting to share his same passion. He began to tractor pull right after he started collecting and would travel almost every weekend to a pull. I guess you could say I didn't have a choice but to fall in his footsteps.

Our family also owns and operates **Golden Hills Golf and Country Club in Lexington, SC**. My granddaddy purchased the land back in the early 1980s from the Caughman family in Lexington. At the time, it was nothing but pastureland and dairy cows. He hired a golf course architect to design the course, while he built the course himself with his construction company. My father, **Chad Berry**, has been superintendent of the course since he graduated from Clemson University in 1992, and also helped in building it. From spraying greens to fixing irrigation leaks, he does it all.

As I was approaching my senior year at Clemson, I was indecisive about what I wanted to pursue a career in. I thought and prayed over it for that semester and finally came to the decision that I would come back home and work alongside my dad as an **Assistant Superintendent**. I went on to get my **commercial pesticides license** and have now been working there for two years. It has been a career I am truly passionate about and take pride in.

Between the two of us, we are back and forth between the course and the farm. Through my experience, I have learned how to **plan our calving season** around our busy grass-growing season at the course and vice versa. The early mornings and long summer days can be challenging, but at the end of the day, I can say with no regret that I am thankful for the ability to do what I do.

My advice to any younger adult going into agriculture or interested in the field is to have an open mind about it. One of the things I benefited from the most growing up and while at Clemson is knowing you can never meet too many people. As the old saying goes, **"It's not what you know, but who you know"**. Most importantly and I will end with this, do what God has led you to do. Pray about that job or career you might be interested in because at the end of the day all of the money in the world can't buy you the happiness that you can receive from having a relationship with the Lord. One of my favorite Bible verses comes out of Galatians 6:7 and says, *"Do not be deceived: God cannot be mocked. A man reaps what he sows"*.
